SCRIPT ALPHA v9.2 / DATAVERSE v5.5

Master Specification & Architectural Compendium

1. System Directive & Unified Spine

Obeys the 8-section v9.2 Unified Spine, bottom-line first presentation, evidence tagging ([Verified], [Reported], [Inferred], [Unknown]), progressive disclosure tiers, and Cart 3 Ask-Before-Guessing entropy checks.

2. Master Storage Engine

Features absolute path resolution (path.resolve()), monotonic nanosecond HRTime TTL stale lock reclamation, Write-Ahead Log (WAL) compaction, and SHA-256 HMAC manifest seals.

3. Telemetry & Bipartite Pipeline

Routes atomic claim units into a 70% Verified Core and 30% Quarantine Drawer, backed by Prometheus metrics exposition on port 9101.

4. Test Suites & CI/CD Automation

Includes 500-worker concurrency stress tests, ENOSPC fault-injection simulations, package.json script automation, and GitHub Actions CI matrix pipelines.
